Message from the Guest Editors

Dear Colleagues,

Mangroves are both economically and ecologically important, covering 70% of the tropical and subtropical sheltered coastlines. They provide many critical ecological functions and ecosystem services. However, mangroves have been extensively eliminated by human-induced habitat destruction and deforestation, inland hydrological alteration, and pollution in recent decades. If such exploitation of mangroves is uncontrolled, it will result in rapid decrease in abundance and diversity of mangroves and subsequently leading to permanent loss in biodiversity and many ecosystem services. Clearly, there is a pressing need for effective conservation, restoration and management of mangrove ecosystems for the battle against climate change and the sustainable future of nature and humans. We encourage studies from all fields, including experimental studies, monitoring approaches and models, to contribute to this Special Issue in order to promote knowledge and adaptation strategies for the preservation, management, and future development of mangrove forest ecosystems.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (*Forestry*) / CiteScore - Q1 (*Forestry*)
