Deadline for manuscript
submissions:
closed (30 June 2018)

Message from the Guest Editors

The future of today's vertical industries (e-Health, intelligent transportation, industrial automation etc.) has diverse and stringent requirements in terms of latency, reliability, data rates and ubiquity. The technical challenges to empower vertical industries require agile, flexible, and smart approaches, which put the onus on researchers to come up with intelligent answers. 5G and beyond are expected to serve this wide range of industries with their advanced wireless communication capabilities. The Special Issue addresses recent developments in theory and practice related to 5G and beyond, to support vertical industries by solving the problems faced by current industrial sectors. Prospective authors are invited to submit papers related to (but not limited to) a diverse range of topics covering the applications, issues, challenges and solutions regarding 5G and beyond to enable vertical industries.

Special Issue

Message from the Editor-in-Chief

Future Internet is a fast-growing journal devoted to rapid publications of the latest results in the general areas of computer networking/communications and information systems, with a focus on the Internet of Things, big data and augmented intelligence, smart systems (in terms of technologies, architectures, and applications), network virtualization, edge/fog computing, and cybersecurity. Both theoretical and experimental papers are welcome. Every year, *Future Internet* also features Special Issues dedicated to specific topics within the journal's scope.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, Inspec, and other databases.
Journal Rank: CiteScore - Q1 (*Computer Networks and Communications*)
