Message from the Guest Editors

This Special Issue of Geosciences aims to gather high-quality original research articles, reviews and technical notes on the use of geosciences for forensic investigations. Forensic Geoscience may be defined as a subdiscipline of geoscience that is concerned with the application of Earth Sciences information and methods to investigations, which may come before a court of law.

I would like to invite you to submit articles about your recent work, experimental research or case studies, with respect to the above and/or the following topics:

- Forensic Geoscience
- Forensic Geology
- Forensic Geophysics
- Forensic Archaeology
- Remote Sensing and GIS in Forensics
- Environmental Forensics
- Ethics and Best Practices in Forensic Geoscience

Message from the Editor-in-Chief

Understanding the Earth's origin and its bio-geological evolution, the multiple implications of the geosciences (as a coherent set of interconnected disciplines), and the sociocultural and ethical interdisciplinary approaches, will be crucial for a better understanding of Nature, and also for undertaking scientifically based political decisions.

We are committed to drive *Geosciences* to a position in which it is recognized for its high-quality, cutting-edge research and scientific influence, and strongly encourage and invite your participation and manuscripts.
