Deadline for manuscript  
submissions:

**31 October 2024**

### Message from the Guest Editor

Dear Collogues,

Cardiovascular diseases are the leading cause of morbidity and mortality worldwide with a heavy burden on healthcare systems. Recent years in medicine and cardiology have been seriously affected by the COVID-19 pandemic. Now that the pandemic is in retreat, we should come back to bench and bedside and start creating our future straightaway. If we go back in time just 20 years, into a world without smartphones, and see what the treatment of the most common cardiovascular diseases looked like, we can appreciate the development in technology, pharmacotherapy, and knowledge sharing. The way it will be in the forthcoming decades is utterly up to us.

To address this issue, we invite both researchers and clinicians to submit the results of their studies on cardiovascular diseases. We expect papers with significant findings, making an impact on our knowledge and the way of thinking about certain cardiovascular diseases. The ultimate goal of this Special Issue is to create a scientific environment that will be able to improve patients' well-being and outcomes.

Thank you for considering publishing with us. We look forward to hearing from you!
