submissions:
closed (31 January 2024)

Message from the Guest Editors

Dear Colleagues,
Virtual reality (VR), has become a subject of interest among researchers. VR can cover a wide spectrum of technologies, such as monitor, the head-mounted display (VR goggle) and EMG-based robotic devices. Apart from physical therapy, VR has also been used to improve neurological diseases. But studies of this area focusing on acceptability, feasibility, tolerability, and initial clinical efficacy studies are still needed. and so are randomized controlled trials that compare clinically important outcomes between intervention and control conditions.

Therefore, we propose this Special Issue and invite the submission of original research on VR support, treatment, and/or assessment in neurological diseases. Systematic reviews and meta-analyses will also be welcomed.

Keywords:

- Virtual reality
- Neurorehabilitation
- Stroke
- Recovery of function
- Neurological diseases
- Multiple sclerosis
- Cerebral palsy
- Robotics
- Parkinson's disease
- Mental health

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Healthcare is an international, scientific, peer-reviewed, open access journal on health care systems, industry, technology, policy, and regulation, and is published semimonthly online by MDPI. Ocular Wellness & Nutrition Society (OWNS) is affiliated with *Healthcare* and its members receive discounts on article processing charges.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), PubMed, PMC, and other databases.

Journal Rank: JCR - Q2 (*Health Policy & Services*) / CiteScore - Q2 (*Leadership and Management*)
