Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Microarrays* will be focusing on Biochip. The understanding of the term "Biochip" shall be an analytical or a diagnostic system using biological or biochemical components, living or not. The system shall also exhibit active functions, such as microfluidic and/or signal transduction. Thus, manuscripts describing cell-on-chip, organ-on-chip, and integrated microarray devices are welcome.

Interesting approaches using 3D printing of biochips are also warmly welcome since this is a very hot topic in the field of functional devices prototyping and production.

Dr. Christophe A. Marquette Guest Editor
