

2nd Edition: Infectious Disease Modeling in the Era of Complex Data

Guest Editors:

Prof. Dr. Elena N. Naumova

Division of Nutrition
Epidemiology and Data Sciences,
Freidman School of Nutrition
Science and Policy, Tufts
University, 150 Harrison Avenue,
Boston, MA 02111, USA

Dr. Tania M. Alarcon Falconi

Division of Nutrition Data
Sciences, Freidman School of
Nutrition Science and Policy,
Tufts University, 150 Harrison
Avenue, Boston, MA 02111, USA

Deadline for manuscript
submissions:

closed (30 April 2023)

Message from the Guest Editors

With the recent explosion of open data sources, novel analytical tools, increased computation and visualization capacities, and public interest in data-related topics, new opportunities have emerged to better understand the nature, drivers, and implications of emerging and re-emerging infections, especially infections notorious for their strong seasonal patterns, sensitivity to climate and weather fluctuations, and links to environmental drivers.

This Special Issue highlights the advancements and challenges of quantifying important features in disease dynamics. We aim to provide a broad range of examples where the knowledge of temporal dynamics, environmental factors, and seasonal characteristics. We especially encourage the submission of interdisciplinary work and multi-country collaborative research. We also encourage the submission of health policy-related manuscripts that focus on issues related to infectious disease dynamics and their relationship to the environment, and recommendations for improving local and global surveillance systems.

The SI first edition (19 nice papers published):

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
