Message from the Guest Editor

Alcohol consumption has become a social and health problem among adolescents and young people in recent years. Binge drinking, heavy drinking, or risky consumption constitute different patterns of alcohol consumption, and these patterns present different prevalence rates, explicative factors, and consequences among adolescents and young people. Therefore, we are especially interested in manuscripts that address the following: (1) identifying the explanatory factors of consumption, mainly the contextual and psychological ones, and its association with other addictions/habits ; (2) assessing the selective attentional bias to alcohol-related stimuli in relation to different patterns of consumption; (3) characterizing the neurocognitive, academic, and social consequences of the various patterns of consumption; (4) defining the proportion of consumers that evolve towards an alcohol use disorder; and determine its risk and protective factors; and finally, (5) determining the impact of the pattern of consumption on the social integration of the subject.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
