Prof. Dr. Jon Øyvind Odland

Deadline for manuscript
submissions:

closed (31 January 2021)

Message from the Guest Editors

The spread of the SARS-CoV-2 virus is a global health emergency involving the health authorities of all countries in an attempt to fight this new pandemic.

Many aspects of the infection have been studied and available epidemiological, clinical and impact data have been used to design preventive interventions. Unfortunately, the spreading of the virus is ongoing, and the impact of the infection is still growing, despite the application of very restrictive preventive interventions. What is more, that impact is huge, both from a clinical and economic point of view.

This Special Issue aims to publish evidence and observations in the field, regarding but not limited to: microbiological aspects; epidemiology; clinical aspects; case management; lab diagnosis; immunology; therapeutic options; vaccine design and development; public health approach; preventive measures; communication. High quality submissions from scholars based in Europe will be considered for a publication cost waiver after completion of the manuscript review process and as recommended by the Editorial Board.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
