Message from the Guest Editors

Socioeconomically disadvantaged parents, such as those living in poverty, are much more likely to have their child taken into out-of-home care (OHC), although it remains unclear how socioeconomic conditions actually cause placement in OHC or whether these differences operate through various types of parental health-related problems. Moreover, we have limited knowledge regarding the effects that OHC might, subsequently, have on the health and wellbeing of the parents, and how this can potentially influence the chances of family reunification. This Special Issue welcomes any contributions aiming to elucidate various familial risk factors for placement in OHC, as well as parental consequences stemming from having a child placed in care.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
