Skaggs School of Pharmacy &  
Pharmaceutical Sciences, La  
Jolla, CA 92093-0657, USA

**Dr. Noël Christopher Barengo**

Deadline for manuscript  
submissions:

**closed (31 December 2021)**

### Message from the Guest Editors

Diabetes has reached worldwide epidemic proportions. According to the International Diabetes Federation in 2019, approximately 837 million people were either living with diabetes (436 million adults) or were at increased risk for developing type 2 diabetes (347 million). Moreover, treatment costs continue to rise at an alarming trajectory, especially those associated with managing macro- and microvascular diabetes complications. In the last few decades, numerous studies have demonstrated that glycemic control can prevent or delay onset of diabetes, or associated eye, kidney, amputations, heart attacks, and strokes associated with diabetes. Healthcare providers, including physician extenders (i.e., pharmacists, nurses, nurse practitioners, physician assistants, certified diabetes care and education specialists, dietitians, physiotherapists), are instrumental in educating and helping patients to achieve their personalized glycemic goals. This Special Issue offers the opportunity to share best practices of how to achieve successful clinical outcomes, improving treatment control in patients with type 2 diabetes.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
