### Message from the Guest Editor

Dear Colleagues,

People spend a huge part of their lifetimes at their place of work. Working conditions can have a significant effect on their physical and mental health. Psychosocial influences at work can be a risk or an opportunity for employees' health. Besides the nature of a psychosocial factor, its health effect may also depend on employees' vulnerability and coping strategies. Overall, the pathways between work-related psychosocial influences and health outcomes can be complex. Our knowledge of moderating and mediating factors in these associations is still limited. Studies investigating the effects of the use of prevention, health promotion, and a healthy work environment to mitigate the health effects of work-related psychosocial risks are still rare.

This Special Issue focuses on psychosocial determinants of employees' mental and physical health. Emphasis is placed on longitudinal investigations and studies disentangling the pathways from psychosocial risks to health outcomes. Studies investigating interventions or working conditions with a mitigating effect on psychosocial hazards are welcomed.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
