Message from the Guest Editors

Dear Colleagues,

The Special Issue will bring together selected papers presented at the Conference "Key Issues in Current Health Research: Ageing–Health–Equity", in Bremen, 29–30 June, 2017, as well as other papers fitting the scope of this Special Issue.

Demographic change and the evolving demands on healthcare systems, especially the provision of healthcare and nursing care for a growing number of older people, are among the greatest social challenges of the next decades. The one hand, there are persisting health inequities related to a social gradient in health. On the other hand, as resources are limited, social challenges to healthcare and the healthcare system will always entail questions of distributive justice.

The Special Issue aims to analyze current developments, and possible solutions and action strategies related to health equity issues. Papers are invited that focus on research obstacles, new methodological concepts, technological developments and innovative solutions.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Social Sciences Citation Index (Web of Science), MEDLINE (PubMed), Scopus (Elsevier) and other databases. Full-text available in PubMed Central.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 4.96 days (median values for papers published in the first six months of 2018).
