### Message from the Guest Editors

Dear Colleagues,

Collaborative research efforts towards understanding indoor environmental health risks and practical solutions for improving indoor environmental quality in buildings, while reducing cost, resource and energy consumption impacts can lead to advances in sustainable built environments. Related topics include, but are not limited to, environmental exposure and health risk assessment; assessment and modelling; indoor air quality; bioaerosols; dampness and mold growth; climate control; thermal comfort; ventilation; occupant perception, acceptance and response; economic impacts and policies; low-cost housing; and sustainable built environments. This Special Issue is open to any subject area relating to indoor environmental quality and health. Research papers, analytical reviews, case studies, conceptual frameworks, and policy-relevant articles are welcome.

Assoc. Prof. Ling Tim Wong

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
