Message from the Guest Editors

Dear Colleagues,

A large body of epidemiological research has identified factors that put members of sexual minorities at risk for mental health problems, including depression, anxiety, and suicidal behavior. Research usually associates interpersonal discrimination with poor mental health outcomes among lesbian, gay, bisexual, trans, intersex, queer people, and other (LGBTIQ+), but further investigations of the influence of social contexts or norms on mental health and wellbeing disparities among sexual minorities are needed. Focusing on enhancing the effectiveness of primary care and related services, while investing in prevention programs, resources, and research, this Special Issue will contribute to diminishing mental health disparities among LGBTIQ+ people and allow further social inclusion of sexual minority individuals. For this Special Issue, we welcome original research, reviews, and commentaries that provide new knowledge about determinants of mental health and wellbeing among LGBTIQ+ people from around the world.

Keywords: LGBTIQ+ people; mental health; wellbeing; sexual stigma; health behavior; risk factors; protective factors

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
