Blockchain in Health Systems

Guest Editor:

Dr. Ana Corte-Real
Faculty of Medicine, University of Coimbra, 3000-548 Coimbra, Portugal

Deadline for manuscript submissions:
28 February 2025

Message from the Guest Editor

This Special Issue will collect contributions from various disciplines to explore the educational, clinical, and practical implications of integrating blockchain in the healthcare sector.

In addition to blockchain, this Special Issue also considers synergies between other information and communication technologies, such as IoT and AI. These technologies, when combined, have the potential to improve healthcare delivery by adapting to clinical demands and ethical and legal standards. The focus of this collection will be on research on conceptual models and studies implementing these technologies in healthcare settings. Our goal is to analyze their impact on public health, occupational health, and legal frameworks.

Overall, this Special Issue seeks to provide insights into the application of blockchain and other emerging technologies in healthcare, offering valuable perspectives for researchers, practitioners, and policymakers alike.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
