# Food Microbiology: The Past and the New Challenges

Guest Editors:

## Dr. Teresa Semedo-Lemsaddek

Centre for Interdisciplinary Research in Animal Health (CIISA), Faculty of Veterinary Medicine, University of Lisbon, Av. da Universidade Técnica de Lisboa, 1300-477 Lisbon, Portugal

#### Prof. Dr. David Rodríguez-Lázaro

Microbiology Section, Department of Biotechnology and Food Science, Faculty of Science, University of Burgos, 09001 Burgos, Spain

Deadline for manuscript submissions:

closed (30 June 2023)

## **Message from the Guest Editors**

Food production and distribution systems are becoming more interdependent, integrated, and globalized. At the same time, escalating and heavily publicized outbreaks of foodborne diseases continue to occur, and have raised awareness on the urgent need to ensure food quality and safety.

In spite of modern advances in traceability, authenticity and overall food safety, the need for improvement continues to be debated, not only regarding developing countries, but also for the industrialized world. Amelioration of economic losses due to food spoilage, lowering food processing costs and avoiding transmission of microbial pathogens through the food chain, while satisfying the growing consumer's demands for foods that are ready-to-eat, fresh-tasting, nutrient and vitamin rich, minimally processed and preserved, are major challenges for the current millennium

In this context, and keeping in mind the One Health concept, quality publications addressing "Food Microbiology: The Past and the New Challenges" constitute a compelling issue for stakeholders and investigators from the farm to the fork.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
