### Message from the Guest Editors

Dear Colleagues,

The youngest members of the populations face the greatest risk of environmental hazards. The majority world's children live in low and middle income countries (LMICs). Environmental hazards and health risks may be more significant in these settings due to rapid urbanization, population growth and displacement, etc. Shortage of medical and public health infrastructure, financial resources, laboratory equipment and technical personnel also contribute to disparate risk. Health disparities also occur in high income countries (HICs) among people of color and lower socioeconomic populations.

We seek manuscripts that can contribute to a global evidence base on child environmental health in LMICs and HICs experiencing environmental injustice. Information on sources of specific contaminants, disease incidence, and biological monitoring from LMICs are welcomed. Research to characterize conditions and prioritize needs, as well as evaluate policies, programs, and interventions, which serve to mitigate exposures and adverse outcomes is of particular interest.

Prof. Dr. Catherine Karr

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
