Deadline for manuscript submissions:
28 February 2018

Message from the Guest Editor

Dear Colleagues,

This Special Issue will focus on emerging environmental factors that influence childhood obesity and innovative, environmental strategies to prevent and treat this epidemic. We are interested in topics such as, though not limited to:

- multi-level, influencing factors
- innovative, environmental interventions
- the role of key stakeholders
- various settings (i.e., home, school, neighborhood, churches, communities)
- environmental, organizational and/or policy changes

Researchers are invited to contribute novel work to be considered for publication in this Special Issue. There are no restrictions on study design and methodology. Articles that focus on either preventing childhood obesity or decreasing the increase in childhood obesity are welcomed. Additionally, articles that focus on underrepresented or disadvantaged communities are encouraged.

Dr. Daheia J. Barr-Anderson
Guest Editor

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Social Sciences Citation Index (Web of Science), MEDLINE (PubMed) and other databases. Full-text available in PubMed Central.

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 27 days after submission; acceptance to publication is undertaken in 5 days (median values for papers published in this journal in first half of 2017).
