Message from the Guest Editors

Dear Colleagues,

During the course of a life, a person's exposure to different risk factors changes and evolves. From malnutrition in the womb to occupational hazards, humans have to tackle multiple challenges.

How populations and individuals deal with risk and its perception, learning mechanisms and coping strategies, how they change and evolve through life, and how to develop health-promotion strategies and implement interventions targeted to specific age groups, are all matters of interest for researchers.

This Special Issue aims to present a broad updated view of risk factor changes and evolution through the lifespan. Contributions from all over the globe are encouraged, in order to provide an image of the best practices and policies each country has in place to deal with this ever-present concern.

Researchers are invited to submit original research articles, using any study design, including case studies, implementation/interventional studies, cohort studies, cross-sectional studies, as well as reviews and meta-analyses.

We look forward to receiving your contributions.

Dr. Ana Sofia Fernandes
Dr. João Pedro Gregório

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
