Deadline for manuscript  
submissions:

**closed (31 May 2019)**

### Message from the Guest Editor

The respiratory system is susceptible to environmental exposures. The global burden of respiratory diseases, due to ambient and household air pollution, is very high and increasing, especially in developing countries. There are chances for emerging environmental risk factors of respiratory diseases that are related to public health issues. There is a need for further scientific evidence to work on preventing environmental lung diseases.

This Special Issue provides an opportunity to publish papers on environmental research in respiratory diseases, as well as public health issues with respect to respiratory diseases. We welcome papers related to evidence of associations and/or mechanisms between environmental factors and respiratory diseases. We are also interested in scientific evidence that could support strategies to prevent environmental lung diseases. All manuscripts will be peer reviewed by experts in this field and would be due in May 2019.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
