submissions:

**closed (15 December 2018)**

### Message from the Guest Editor

Risky sexual behaviors leave teens vulnerable to sexually transmitted infections (STIs) and unplanned pregnancy, which impact sexual and reproductive health worldwide. Many teen parents drop out of school, incurring educational and economic setbacks for themselves and their children. Individual and systemic supports, such as school and community-based programs, healthcare services, and family and peer-based interventions can mitigate the potential for risky sexual behavior. Studies that address teens' contexts, such as race and culture, gender, sexual orientation and family backgrounds can be used to develop and inform interventions that are sustainable, relevant, and context-specific. This Special Issue will focus on the genesis and implications of teens' sexual risk behaviors and delineate contextually-relevant supports for teens' reproductive health.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
