Work Stress and the Development of Chronic Diseases

Message from the Guest Editors

Dear Colleagues,

We are organizing a Special Issue on the impact of work stress on the development of chronic diseases in the International Journal of Environmental Research and Public Health.

In times of ageing populations, people work and live longer, but, while aging, they also suffer more often from chronic diseases. Analyzing the impact of work stress on the development of chronic diseases is, therefore, a topic of high relevance to science, as well as to policy. With this Special Issue, we invite you to submit high-quality original research articles or reviews that provide solid new findings extending the current state of knowledge. Preference will be given to contributions using longitudinal data and or experimental/intervention designs. Studies with cross-sectional design will only be considered as exceptions if convincingly justified.

Prof. Dr. Johannes Siegrist

Dr. Jian Li

Guest Editors

Deadline for manuscript submissions: closed (30 November 2017)
Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

**Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed by the Science Citation Index Expanded (Web of Science), Social Sciences Citation Index (Web of Science), MEDLINE (PubMed), Scopus (Elsevier) and other databases. Full-text available in PubMed Central.

**Rapid publication:** manuscripts are peer-reviewed and a first decision provided to authors approximately 22 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in 2017).
