Interfaculty Department of  
Geoinformatics - Z\_GIS,  
University of Salzburg, Salzburg,  
Austria

thomas.blaschke@sbg.ac.at

**Dr. Song Gao**

Department of Geography,  
University of Wisconsin, Madison,  
WI 53796, USA

song.gao@wisc.edu

Deadline for manuscript  
submissions:

**15 April 2018**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue invites original contributions that tackle the handling of place and address the meaning of place in GIScience, Geoinformatics and neighboring disciplines. Research may contribute to the following overarching questions: How can place be adequately addressed and handled with established or new GIScience theory and methods? What methodologies from other disciplines (e.g., computer science, linguistics, etc.) can be considered in order to sufficiently account for place-based analyses? We welcome submissions from diverse disciplines, including Environmental Psychology, Linguistics, Urban Planning, Spatial Economics, Geographic Information Science, Spatial Cognition, Human–Computer Interaction, Data Science, Smart City, Big Data, Health and Place, and others.

Prof. Thomas Blaschke

Dr. Song Gao
