*Deadline for manuscript
submissions:*

15 April 2018

Message from the Guest Editors

Dear Colleagues,

This Special Issue invites original contributions that tackle the handling of place and address the meaning of place in GIScience, Geoinformatics and neighboring disciplines. Research may contribute to the following overarching questions: How can place be adequately addressed and handled with established or new GIScience theory and methods? What methodologies from other disciplines (e.g., computer science, linguistics, etc.) can be considered in order to sufficiently account for place-based analyses? We welcome submissions from diverse disciplines, including Environmental Psychology, Linguistics, Urban Planning, Spatial Economics, Geographic Information Science, Spatial Cognition, Human–Computer Interaction, Data Science, Smart City, Big Data, Health and Place, and others.

Prof. Thomas Blaschke

Dr. Song Gao

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: The journal is covered by **Science Citation Index Expanded** (Web of Science), Scopus and INSPEC (IET).

Rapid publication: manuscripts are peer-reviewed and a first decision provided to authors approximately 30 days after submission; acceptance to publication is undertaken in 4 days (median values for papers published in this journal in first half of 2017).
