

## The Food Processing Industry's 200th Anniversary: Bioactive Compounds, Antioxidants, and Potential Health Benefits

Guest Editors:

**Dr. Vassilis Athanasiadis**

Department of Food Science and Nutrition, University of Thessaly, Terma N. Temponera Str., 43100 Karditsa, Greece

**Dr. Theodoros G. Chatzimitikos**

Department of Food Science and Nutrition, University of Thessaly, Terma N. Temponera Str., 43100 Karditsa, Greece

Deadline for manuscript submissions:

**20 September 2024**

### Message from the Guest Editors

The term "industrial revolution" is shorthand for a historical era that began in Great Britain in the 18th century and was characterized by an apparent acceleration of progress. Over the years, the food industry has changed and adapted to meet changing consumer demands and behaviors. The supply, consumption, and delivery of food products around the world are part of a complex system that define this industry. Food processes can bestow the potential health benefits of bioactive compounds in food processed products. People with allergies, diabetes, and other health issues who cannot consume certain, common food items also benefit from modern food processing.

Since it is necessary to develop approaches that provide improved food products for human health and well-being, while minimizing the environmental impact, such that the circular economy becomes a reality in food (and industrial) processing, this Special Issue will (I) explore the maintenance or enhancement of the concentration of bioactive compounds that can be used as functions in foods during their processing and (II) examines the mechanisms by which the desired effect is achieved.

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
