Pharmacological Treatment of Neuropsychiatric Disorders

Guest Editors:

Dr. Cinto Segalàs
1. OCD Clinical and Research Unit, Psychiatry Department, Hospital Universitari de Bellvitge, L'Hospitalet de Llobregat, Barcelona, Spain
2. CIBERSAM (Centro de Investigación en Red de Salud Mental), Instituto de Salud Carlos III, Madrid, Spain
3. Department of Clinical Sciences, Bellvitge Campus, University of Barcelona, Barcelona, Spain

Dr. Montse Fernández Prieto

Deadline for manuscript submissions:
30 October 2024

Message from the Guest Editors

Dear Colleagues,

Despite major advances in research and the development of new pharmacological treatments, the clinical response for neuropsychiatric disorders remains poor, leading to increased chronicity, suffering, and disability in refractory patients. This is partly due to imprecise diagnostic criteria, incomplete knowledge of the molecular pathology underlying these disorders, and the absence of biomarkers. Different disciplines like neuroimaging, genetics, neurophysiology, neuropsychology, psychoendocrinology, omic sciences, and artificial intelligence; have attempted to understand the neurobiological basis and discover possible biomarkers and predictors of responses in order to offer patients a more effective and personalised treatment.

In this open-access Special Issue, authors are invited to share their significant work in the area of response predictors and biomarkers of neuropsychiatric disorders, with the aim of optimising the available pharmacological treatments for neuropsychiatric disorders, learning about the latest advances in this field, and offering better and more effective treatments to our patients.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
