Message from the Guest Editors

Dear Colleagues,

Recently, lncRNA has become a potential hot topic in diagnosing human disease and as biological markers in predicting the prognosis and treatment in cancer. They also play an important role in the development of fibrosis-related diseases in various organs including the liver, heart, lung, and kidney. Fibrosis is the excess deposition of extracellular matrix components, which can occur in multiple organs, and ultimately leads to organ failure. lncRNA is also highly disease- and tissue-specific, and they could be an ideal therapeutic target for developing treatment against fibrosis-related disease.

This open-access Special Issue will bring together original research and review articles on the functions of lncRNAs in various fibrotic diseases of the liver, heart, kidney, lung, and peritoneum. Furthermore, this Special Issue systematically highlights the roles of lncRNAs and technical developments on the use of lncRNAs as diagnostic markers and therapeutic targets for their clinical use in human fibrotic diseases.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
