submissions:

closed (20 February 2024)

Message from the Guest Editor

Dear Colleagues,

Next-Generation Sequencing technologies can improve our knowledge of the molecular genetics of human diseases, but may also lead to uncertainty during the interpretation of the results. Providing a definitive genetic diagnosis is critical in prenatal testing or management of severely affected paediatric patients and can be especially challenging in affected individuals in whom a broad unbiased sequencing approach such as whole-exome sequencing or whole-genome sequencing is potentially detrimental. Molecular studies are warranted to clarify the genetic basis of human diseases and emphasize the importance of functional studies in the diagnostic variant reclassification process.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
