

## Micro-Scale Approaches in Regenerative Medicine and Tissue Engineering 2023

Guest Editors:

**Prof. Dr. Valeria Chiono**

**Dr. Irene Carmagnola**

**Dr. Alice Zoso**

Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editors

The field of tissue engineering and regenerative medicine (TERM) has dramatically advanced in the last 20 years, providing the potential for regenerating almost every tissue and organ of the human body. TERM aims at the design of functional three-dimensional constructs able to properly guide cell behavior for tissue/organ regeneration or modeling.

TERM has taken the advantage of an interdisciplinary approach, involving aspects of cell biology, biomaterials science, surface functionalization and characterization, and cell–material interactions often integrated into microfabricated systems to accurately reproduce the complexity of in vivo microenvironments, including ECM organization and other tissue features (e.g., electrical stimuli, mechanical stress). The microscale design of cell culture environments has the potential to allow controllable and reproducible cell organization following tissue-specific cues. The topics to be covered in this issue include advanced microtechnologies applied to the TERM field.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
