Deadline for manuscript  
submissions:

**closed (31 October 2023)**

### Message from the Guest Editor

Cancer is a disease exhibiting uncontrollable cell growth and spreading to other parts of the organism. Studies have shown that real and simulated microgravity impact survival, apoptosis, proliferation, migration, and adhesion as well as the cytoskeleton, the extracellular matrix, focal adhesion, and growth factors in cancer cells. This SI focuses on the effects of real and simulated microgravity on different types of cancer cells and on cancerous stem cells. The new studies will demonstrate that microgravity has become an important new technology for increasing current knowledge of cancer biology. In addition, we will focus on the impact of cosmic radiation, available countermeasures, and possible applications on Earth. All available platforms to study real microgravity and ground-based facilities available to simulate microgravity on Earth can be used for studying changes in various cancer cell types. Articles and reviews will be published that examine either the molecular biological background of external signals in cancer or the cellular mechanisms responsible for the manifold changes occurring in cancer cells, cancer stem cells as well as animals when exposed to microgravity.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. José L. Quiles

Department of Physiology,  
Institute of Nutrition and Food  
Technology “Jose Mataix”,  
Biomedical Research Center,  
University of Granada, Avda.  
Conocimiento s/n, 18100 Armilla,  
Granada, Spain

## Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
