Prof. Dr. Takashi Ito

Department of Biochemistry, Nagasaki University School of Medicine, Nagasaki, Japan

Message from the Guest Editors

Dear Colleagues,

Various types of epigenomic regulation system are involved in ontogenetic and disease development, including DNA methylation, histone codes such as protein methylation, and acetylation. Other types of post-translational protein modification systems also interact with epigenetic regulations. Chromatin structures and various stimuli affect epigenetic states. The dysregulation of these epigenetic systems cause diseases including cancers, as well as neurological and immunological disorders. In this Special Issue, we call for the submission of articles and reviews on all aspects of epigenetic regulations in diseases.

Prof. Dr. Mitsuko Masutani

Prof. Dr. Takashi Ito

Guest Editors

Deadline for manuscript
submissions:

30 June 2024

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
