Deadline for manuscript  
submissions:

**closed (28 January 2019)**

### Message from the Guest Editors

Dear Colleagues,

Currently, nano/microparticles are widely used in various fields. Silver particles are one of the most vital materials among the various particles, due to their unique optical-physical-chemical properties. The materials have been proposed for various fields such as bio-sensor, diagnostics, imaging, catalyst and antibacterial. Especially, size-dependent unique plasmonic properties make the particles superior in biomedical applications.

This special issue is aimed to provide a range of original contributions detailing the synthesis, modification, properties and applications in different areas of silver materials, particularly in nanomedicine.

### Keywords:

- Ag nanoparticles
- Ag microparticles
- Plasmonic nanoparticles
- Biosensor
- Diagnostics
- Imaging
- Bio applications
- Optical property
- Catalyst
- Antibacterial

## Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Biochemistry & Molecular Biology*) / CiteScore - Q1 (*Inorganic Chemistry*)
