submissions:

closed (31 October 2021)

Message from the Guest Editors

Dear Colleagues,

Nature employs a combination of supramolecular interactions (e.g., electrostatic, hydrophobic, π - π , cation/anion- π , van der Waals forces, hydrogen-bonding and metal coordination) to generate hierarchically ordered structures with remarkable stimuli-responsive properties. The same structure-directing forces can, in principle, be employed for the realization of manufactured assemblies with similar or perhaps even greater utility. In this Special Issue of the *International Journal of Molecular Sciences* devoted to "Supramolecular Materials", we warmly invite submissions related to the synthesis, characterization and technical/biomedical applications of supramolecular entities.

Dr. John G. Hardy
Dr. Emily R. Draper

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
