Message from the Guest Editors

Dear Colleagues,

Digital systems and technologies have reshaped how work is designed, performed and managed in organizations. The digital work environment has created a situation where digital work has become the “new normal” for individuals in organizations. This has been well demonstrated during the COVID-19 global pandemic where many individuals have been forced to work from home due to government-enforced lockdowns. The flexibilities that digital work provide for individuals in terms of where, how and when work is completed lead to numerous benefits including higher job satisfaction, increased autonomy, improved productivity, reduced work–family conflict, lower stress and reduced commuting time and costs.

This Special Issue aims to provide a forum to explore the opportunities and challenges that digital technologies bring into the contemporary workplace. Both theoretical and empirical research papers are welcome. Novel approaches to the study of digital work, telework, telecommuting and related phenomena are particularly desirable. Potential topics include, but not limited to:

- telework or telecommuting;
- digital technologies;
- information technology.

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [ESCI \(Web of Science\)](#), [Ei Compendex](#), [dblp](#), and [other databases](#).

Journal Rank: CiteScore - Q2 (*Information Systems*)
