Prof. Dr. Zeping Xu

Prof. Dr. Camilo Marulanda E.

Dr. M. Amin Hariri-Ardebili

Message from the Guest Editors

Dam construction and operations have evolved greatly, and the goals of dam engineering have been refined over the past decades, primarily affected by increased demand for fresh water and clean energy production, hydrologic extremes caused by climate change, ageing infrastructure, a need for more economical use of resources, and higher expectations for ecological and safety standards. Therefore, the role and the responsibility of the engineering community in the 21st century has been influenced by all these challenges.

In this Special Issue on “Advances in Dam Engineering of the 21st Century”, we would like to invite researchers and engineers to submit papers focused on the latest advances in dam engineering. We welcome both theoretical and practical papers of high technical standard for various aspects of dam engineering, thus facilitating an awareness of modern techniques and methods in the area of interest. We sincerely invite high-quality submissions of original research as well as review articles that have the potential for practical application.

For more information about the Special Issue, please see: www.mdpi.com/si/128535

Deadline for manuscript
submissions:
closed (14 March 2024)

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank: CiteScore - Q2 (*Building and Construction*)
