Message from the Guest Editors

In this Special Issue, we would like to publish research articles focusing on the implementation of BIM in the transport infrastructure sector of civil engineering to optimize the time, costs, and quality of interventions. We welcome both theoretical and application papers presenting studies related to any phase of an infrastructure's life cycle, from its design to its construction and management as it becomes operative.

Moreover, papers regarding the application of BIM processes to different assets of a transport infrastructure, such as existing and designing, are welcomed and of great interest for the proposed Special Issue. Furthermore, the use of survey data for the digital modeling of civil infrastructures, studies of innovative non-destructive techniques and their integration in I-BIM processes are also topics of interest for this Special Issue; finally, we encourage submissions of BIM applications for risk and safety management in transport infrastructures.

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank: CiteScore - Q2 (*Building and Construction*)
