submissions:

closed (30 September 2021)

Message from the Guest Editors

This Special Issue will collect high-quality original research papers on recent developments in the area of pavements. Hence, papers with a focus on areas including, but not limited to, use of new technologies, approaches, or applications to infrastructure pavements with a new vision on pavement management, rehabilitation, and conservation, are encouraged. Review papers in the aforementioned research areas will also be considered.

Topics of interest include, but are not limited to the following:

1. Infrastructure domains (roads, railways, and airports)
2. Research domains (theoretical, numerical, and experimental research)
3. Application areas (design, rehabilitation, quality control, and management)
4. Construction materials (bitumen, polymers, soil, and aggregates)
5. Structure types (flexible, concrete, compound)
6. Assessment methods (destructive, minor destructive, and non-destructive)
7. Natural and anthropic environmental variables (extreme climate conditions, urbanization, and environmental landscape constraints).

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank: CiteScore - Q2 (*Building and Construction*)
