Deadline for manuscript  
submissions:

**closed (1 November 2018)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue will address some of the most essential issues currently affecting the safety, reliability and functionality of global rail infrastructure systems. This Special Issue will accept various novel and original research topics related to railway infrastructure systems, including, but not limited to:

- Stability and dynamics
- Safety, risks and uncertainty
- Infrastructure engineering
- Structural engineering and materials
- Transportation geotechniques
- Rail transportation
- Mechanics, prognostics and diagnostics
- Health monitoring, inspection, NDT&E (non-destructive testing and evaluation) and signal processing
- Big data analytics and railway operations
- Multi hazards and climate change adaptation
- Train-track interaction and wheel-rail interface
- Drainage, surveying, photogrammetry, remote sensing and drone technology
- Railway and transportation technologies

## Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

**Journal Rank:** CiteScore - Q2 (*Building and Construction*)
