Message from the Guest Editors

Dear Colleagues,

Surgically determined treatment and care of gastric cancer has experienced development for more than 15 years.

The implementation of neoadjuvant chemotherapy has led to substantial progress in surgical therapy and its early postoperative and long-term oncosurgical outcome. In addition, surgical specimens and tumor tissue have been better characterized step-by-step.

From a surgical point of view, the surgical potential of recurrent and metastatic tumor growth (i.e., hepatic and peritoneal metastases) as well as prospects for palliative tumor resections have become of great interest in the surgical community. Furthermore, multi-modal treatment concepts as well as gender- and BMI-dependent specifics may be of particular interest with regard to patient-, diagnosis-, tumor tissue- and surgical treatment-associated characteristics (such as perioperative factors and parameters). All the mentioned aspects are potential topics of interest for this Special Issue. We invite the submission of papers focusing on:

Evaluating original data;
Summarizing and discussing available data by means of a meta-analysis, systematic or narrative reviews.

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [CAPUS / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
