### Message from the Guest Editor

Dear Colleagues,

In addition to involving the respiratory system, COVID-19 can also affect the cardiovascular system, causing acute and/or chronic myocardial injuries. COVID-19 patients may present cardiovascular involvement irrespective of the severity of COVID-19 illness.

.....

In this Special Issue of *JCM*, we intend to present publications regarding the prevalence of CVD, diagnosis using biomarkers/cardiovascular imaging, validation of treatment and the follow-up protocol. In addition, publications regarding the role of vaccination in the development of cardiovascular disease will be also included.

We strongly believe that this Special Issue will clarify questions regarding CVD due to COVID-19, and we invite you to submit your valuable contribution and provide an opportunity to build an exciting and useful issue about CVD in the era of COVID-19.
