Deadline for manuscript
submissions:

31 May 2024

Message from the Guest Editor

Dear Colleagues,

With the increasing prevalence of AF and the rapid advancements in therapeutic approaches, it is crucial to gather and disseminate the latest research findings to improve patients' outcomes. This Special Issue will cover a wide range of topics related to the treatment of atrial fibrillation. These include, but are not limited to:

1. Pharmacological interventions and antiarrhythmic drugs;
2. Catheter ablation techniques and advancements;
3. Novel surgical approaches for AF management;
4. Non-pharmacological therapies, such as lifestyle modifications and alternative treatments;
5. Device-based therapies, including pacemakers and implantable cardioverter-defibrillators (ICDs);
6. Personalized medicine in AF treatment.

We invite original research articles, systematic reviews, meta-analyses, and clinical trials that contribute to our understanding and advancement of treatment options for atrial fibrillation.

We look forward to receiving submissions that contribute to the advancement of treatment strategies in atrial fibrillation, and ultimately, improve patient care.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
