Deadline for manuscript  
submissions:

**15 January 2025**

### Message from the Guest Editor

A new era of neurorehabilitation is upon us. Researchers have determined that the physical and neurological functions themselves form the basis of our physical and neurological systems and induce plastic change. No ground-breaking treatment innovations, as represented by regenerative medicine or gene treatment, will be able to stand alone without rehabilitation, as long as that treatment requires the reorganization or maturation of the patients' neural system. Moreover, with advancements in a variety of fields such as brain science, robotics, virtual reality, and neuro-engineering, researchers, all around the world, are currently establishing new treatment modalities. Rehabilitation is the hope for people with neurological diseases and injuries.

For this Special Issue, we invite neurorehabilitative studies and methodology reports, as well as review papers from both clinical and preclinical fields.

Dr. Syoichi Tashiro

**Prof. Dr. Kent Doi**

Department of Emergency and  
Critical Care Medicine, University  
of Tokyo, Tokyo 113-8655, Japan

## Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
