Message from the Guest Editor

Dear Colleagues,

The last decade saw enormous progress in our ability to treat and control chronic hepatitis C virus liver disease. In more recent years, nonalcoholic fatty liver disease (NAFLD) has emerged as a significant cause of liver disease, affecting millions worldwide. This chronic condition is characterized by the build-up of fat in the liver, which can lead to inflammation, fibrosis, and even cirrhosis. While the traditional risk factors for liver disease, such as hepatitis C, have declined due to effective treatment and prevention measures, NAFLD has become more prevalent due to changes in lifestyle and diet.

In this Special Issue, we welcome authors to submit papers on the global changes in disease prevalence. Clinical advances in the diagnoses; factors associated with disease progression; and the results of ongoing trials and advances in disease treatment are encouraged.

Dr. Gerond V. Lake-Bakaar

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
