Message from the Guest Editor

Dear Colleagues,

In recent years, there has been a significant transformation in treatment approaches for spinal cord injury (SCI). The application of regenerative medicine and/or novel drugs to SCI in clinics had been reported by various experts. The effectiveness of early decompression surgery is becoming increasingly apparent and more widespread. Additionally, several new diagnostic and therapeutic approaches for SCI have been reported, including the application of AI as a prognostic prediction method, novel imaging modalities and innovative rehabilitation tools showing potential effectiveness to promote functional recovery in SCI patients.

In this Special Issue, we aim to summarize these recent advancements and try to provide insights into prospects and directions to move in.

Dr. Masao Koda

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
