Deadline for manuscript
submissions:

25 September 2024

Message from the Guest Editor

Dear Colleagues,

Ultrasound has revolutionized the field of obstetrics and gynecology, offering a non-invasive, real-time visualization tool crucial for the diagnosis and management of various conditions. Its evolution from simple 2D scans to advanced 3D and 4D imaging has significantly enhanced our understanding and management of obstetric and gynecologic diseases. Despite these advancements, this field faces ongoing challenges in the standardization of protocols, interpretation of complex images, and integration of emerging technologies like elastography and contrast-enhanced ultrasound. The rapid evolution of ultrasound technology calls for continuous research and updates in clinical practices.

This Special Issue aims to address the pressing need for updated knowledge and practice guidelines in the ultrasound diagnosis of obstetric and gynecologic diseases.

We look forward to submissions that offer insightful perspectives, novel approaches, and significant research findings that will contribute to the advancement of ultrasound diagnostics in the ever-evolving landscape of obstetrics and gynecology.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
