Deadline for manuscript
submissions:

24 September 2024

Message from the Guest Editor

Cataract surgery is the most common surgical procedure. It undisputably improves visual functioning dramatically, which in turn gives great improvement in a person's quality of life. Numerous advances in instrumentation and medical treatment have increased the safety of the procedure, even in complicated cases. Moreover, advances in intraocular lens design and biometry have further increased patients' and doctors' expectations of cataract surgery. It is considered not only as an operation that restores vision but also as a refractive procedure that minimizes if not eliminates the use of glasses.

Refractive surgery, likewise, is continuously evolving. New techniques with an improved safety and predictability profile are coming into practice, aiming to provide refractive results that match the increased expectations of the patients.

Accordingly, we would like to announce a Special Issue called "State of the Art in Cataract and Refractive Surgery". This Special Issue calls for original research and reviews that have investigated new techniques in cataract and refractive surgery.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
