Message from the Guest Editor

Dear Colleagues,

Male Sexual and Reproductive Health is an important issue worldwide. Approximately 20%–30% of adult men have at least one sexual dysfunction (SD). Among these, erectile dysfunction and premature ejaculation are the most frequent. In addition, couple infertility affects 15-20% of couples worldwide.

Alongside aging and organic causes, i.e., vasculogenic, neurogenic, endocrinological, metabolic, osteoporosis, etc., also psychological causes could impair Sexual and Reproductive Health.

In addition, incorrect lifestyle (i.e., psychological stress, inadequate physical activity, high scrotal temperature, etc.), environmental factors and nutritional habits could play an important role both in the development of SD as well as infertility.

The investigation of all these aspects could be useful to ameliorate the prevention, diagnosis and treatment of the patients.

Therefore, this Special Issue will explore SD and infertility etiology, comorbidity and management based on a combination of original research and review papers.

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
