Message from the Guest Editor

Dear Colleagues,

Microsurgery is a fundamental cornerstone of the armamentarium of a reconstructive surgeon, such as lymphedema and reconstructive needs like genital gender-affirming surgery, which is essential for a patient's self-perception and social life.

The aim of this Special Issue is to emphasize these improvements through the publication of papers addressing the above topics with solid scientific evidence. Basic research papers, clinical papers and reviews focused on clinical progresses in microsurgical reconstruction are all highly encouraged for submission.

Keywords:

- microsurgery
- supermicrosurgery
- microvascular anastomosis
- head and neck reconstruction
- oro-maxillofacial re-construction
- plastic and reconstructive surgery
- limb reconstruction
- breast reconstruction
- genital reconstruction
- lymphedema
- lymph nodes transfer
- facial reanimation
