Message from the Guest Editor

Dear Colleagues,

As we know, in the past 7–8 years there has been great technical and theoretical changes in regard to endovascular stroke treatment, mainly due to a increase in the number of procedures, improvements in devices and different approaches used.

The aim of this Special Issue is to better understand new technical approaches and devices, with the hope of improving outcomes in patients with acute ischemic stroke.

Topics can include but are not limited to:

1. New devices
2. Approaches and devices for -ICA TE (thromboembolic occlusion)
3. Approaches and devices for DMVO
4. Approaches for tandem occlusion
5. Rescue stenting and ICAD: approach and devices
6. Advancements in medical management in EVT
7. Advancements in the thromboaspiration-ADAPT technique
8. Advancements in the SR-Thrombectomy technique

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) / CiteScore - Q1 (*General Medicine*)
